## EXPERIENCE

### ENTREPRENEURSHIP ENVIRONMENTS
### 2018 - 2021

Since brainstorming with the team until creating presentation pitch, I conducted User Researches and designed some versions of the shopping app to mobile. Also redesigned it after Usability Testing with Figma prototyping tools.

Created the first Videosite, a new way of navigating through and interacting with websites.

Worked for 2.5 years in a voluntary entrepreneurship group, applying Design Thinking and Lean Startup methods.

## Thoughts

I am very interested in Design as a whole, since brainstorming, passing through UX and creating a real UI to solve people's problems. As a way to design realistic features I also practice programming, as Javascript, CSS and HTML for webpages. Already did some programs with data structures in C too.
